

## FLAVEX produces a comprehensive range of herb & spice CO<sub>2</sub>-extracts

CO<sub>2</sub>-extracts of Camomile, Marigold and Sea-buckthorn are widely used as bioactive components in creams, sun creams, skin oils, shampoos and body milk products. FLAVEX extracts herbal active substances, flavours and fragrances in a natural and clean process, safe for the environment. The new and gentle technology for the extraction of sensitive plant ingredients is based on SFE Supercritical Fluid Extraction.

In-house designed CO<sub>2</sub>-extraction plants with state of the art measurement and control sys-

tems are best suitable for resolving critical separation problems. Competence, continuous R&D efforts of our expert teams as well as detailed documentation of all relevant steps – from raw material right up to the finished product – are the base of our stringent product quality. The traceable QS-system with modern analytical methods guarantees for the authenticity of FLAVEX CO<sub>2</sub>-extracts.

Be on the cutting edge with CO<sub>2</sub>-extracts.
