Lonza Launches New Preservation Website for Personal Care and Homecare Products

Allendale, NJ (USA), 31 October 2016 – Lonza Consumer Care has launched a new website www.lonzapreservation.com dedicated to its preservation offerings to the personal care and homecare markets. The website consolidates all Lonza Consumer Care information on preservative and protection systems product ranges, news, seminars and events. In addition, it features the FormulaProtect® and Preservation Connection™ online preservative-selector tools for personal care and homecare, respectively.

“Our new website enables formulators and other preservation-focused professionals to access Lonza Consumer Care preservative information in one central online location rather than to work through the individual personal care and hygiene sites to find the desired information,” said Phil Hindley, Head Global Marketing, Preservation.

He noted that formulators in homecare and personal care share many of the same challenges in identifying and selecting preservatives for their products. “Our new site is comprehensive, prominent and easy to navigate,” he added.

Lonza Consumer Care offers a comprehensive range of preservation and protection systems to the global homecare and personal care markets. This broad portfolio of single active and blended preservatives offers traditional, non-traditional and novel technologies with broad spectrum efficacy, extensive substrate compatibility, robust data packages and global acceptance and regulatory compliance.

Key brands include the Proxel® range of BIT-based systems, the cost-effective Dantogard® and Glydant® series of preservatives built around DMDMH, and the company’s expanding range of “next-generation” non-traditional preservatives and protection systems under the Geogard®, Mikrokill®, Rômacil® and Biovert® brands.

Press Release

About Lonza Consumer Care – Personal Care

Part of Lonza's Consumer Care business unit, the Personal Care business has long been the world's leading supplier of active antidandruff agents, with its Zinc Omadine[®] product considered the gold standard in the antidandruff shampoo market. Lonza Personal Care also supplies a wide array of other hair- and skin-care products, including biotechnology-derived active ingredients, preservatives for use in certified natural and organic products and other products, proteins, emollients, delivery systems and more. More information can be found at www.lonza.com/personalcare.

About Lonza's Hygiene Business

A key part of Lonza's Consumer Care business unit, the Hygiene business offers the broadest portfolio of registered actives, preservatives and formulations for use in disinfectants, sanitizers and institutional and homecare cleaning products. This wide range of solutions is used to disinfect and sanitize schools, food processing plants, restaurants, grocery stores, hospitals, homes and more. More information can be found at www.lonza.com/hygiene

About Lonza

Lonza is one of the world's leading and most-trusted suppliers to the pharmaceutical, biotech and specialty ingredients markets. We harness science and technology to create products that support safer and healthier living and that enhance the overall quality of life.

Not only are we a custom manufacturer and developer, Lonza also offers services and products ranging from active pharmaceutical ingredients and stem-cell therapies to drinking water sanitizers, from the vitamin B3 compounds and personal care ingredients to agricultural products, and from industrial preservatives to microbial control solutions that combat dangerous viruses, bacteria and other pathogens.

Founded in 1897 in the Swiss Alps, Lonza today is a well-respected global company with more than 40 major manufacturing and R&D facilities and approximately 9,800 full-time employees worldwide. The company generated sales of CHF 3.8 billion in 2015 and is organized into two market-focused segments: Pharma&Biotech and Specialty Ingredients. Further information can be found at www.lonza.com.
