## Urban-green: Cosphatec's in-cosmetics global 2018, Amsterdam

For the 10<sup>th</sup> anniversary at in-cosmetics global, this year in Amsterdam, Cosphatec surprises with an extraordinary and green booth design. Plants and trees as well as natural seating areas create an urban look and a unique atmosphere.

The focus in 2018 is again on our natural alternative preservatives and the newly developed Cosphaderm® Feel, a natural and COSMOS-certified silicone replacement.

The "Cosphatec SkinSmoothie", from this years' Formulation Lab, has sparked the interest of the formulators early on and of course they were not disappointed during the lab session. With great enthusiasm, the participants created their green, orange and yellow natural SkinSmoothies - preserved with Cosphatec's alternative preservatives.

Through steady growth we could introduce many new colleagues at the fair as well as welcome new distribution partners to the team. Also, the first Cosphatec-Party contributed to getting to know each other better and was celebrated until the early morning.

An exciting and eventful week lies behind the entire team and we look forward to the in-cosmetics global 2019 in Paris!

If you have not had the opportunity to meet us in person, you are welcome to visit our homepage at [www.cosphatec.com](http://www.cosphatec.com)
