Cosphagard® -Line

Efficient and paraben-free – the brand new Cosphagard®-line

Cosphatec GmbH has created a brand new product-line with a combination of well-established Multifunctionals and traditional antimicrobial substances which allow a safe and efficient conservation without using criticized preservatives like Parabens, Triclosan and MIT. Even in low concentrations the Cosphagard®-blends show a strong efficiency against bacteria, yeasts and molds. The carefully designed and made in Germany Cosphagard®-blends are water soluble, innovative and provide an extremely good price-performance ratio.

NEWS: The Cosphagard® Pretec has been nominated for the “Innovation Zone New Ingredient Award” at the in-cosmetics Asia 2016.
