

MAGNETIZE ME!

CORPACK INTRODUCES THE NEW AVALON LIGHT – SNAP & GO

The magnetic refillable AVALON Light compact series combines elegance, functionality and ease of use. Refill compacts are an environmentally friendly solution, extending the life of the packaging by reusing the primary package and reducing waste.

Thanks to its magnet system and a small recess in the base, the products are easy to replace: remove, insert – done.

The AVALON light line is available in the following sizes (mirror optional):

- Small Eye Shadow Compact: Pan size Ø 30 mm
- Blusher Compact: Pan size Ø 42 mm
- Pressed Powder Compact: Pan size Ø 59 mm
- Cream-To-Powder Compact: Pan size Ø 59 mm, base with compartment for sponge

The following decoration options are available: hot stamping, screen printing, spray coating and metallizing

You want to combine the AVALON compacts with other components, such as lipstick, lip gloss or mascara? In our standard portfolio you will find the right packaging solution.
