

# Neo Cos Service GmbH

## Cosmetic Production

### ABOUT US

The Neo Cos Service GmbH, a company for the development, manufacture and marketing of cosmetic products with medical and cosmetic consulting service was founded in 1991 in Hoexter-Stahle and has established itself as a successful full-service cosmetic manufacturer for contract manufacturing.

After pursuing active growth and investment policies the company now employs more than 50 employees and occupies an area of over 3,600 square meters. Modern development, production and packaging lines together with functional quality-control and administration areas complete the picture.

### OUR PHILOSOPHY

As a highly effective specialist company we focus exclusively on the development and production of your cosmetic products.

Top priority of all services of the Neo Cos Service GmbH Teams is to satisfy our customers.

Innovative custom-made development concepts, incorporating the latest active ingredients as well as conventional cosmetic products, are quickly and reliably designed and manufactured according to your proposed formulations or to your own specifications, implementing the latest scientific knowledge of dermatology, botany and biochemistry.

We are also happy to review your existing formulations and adapt them to prevailing legal regulations.

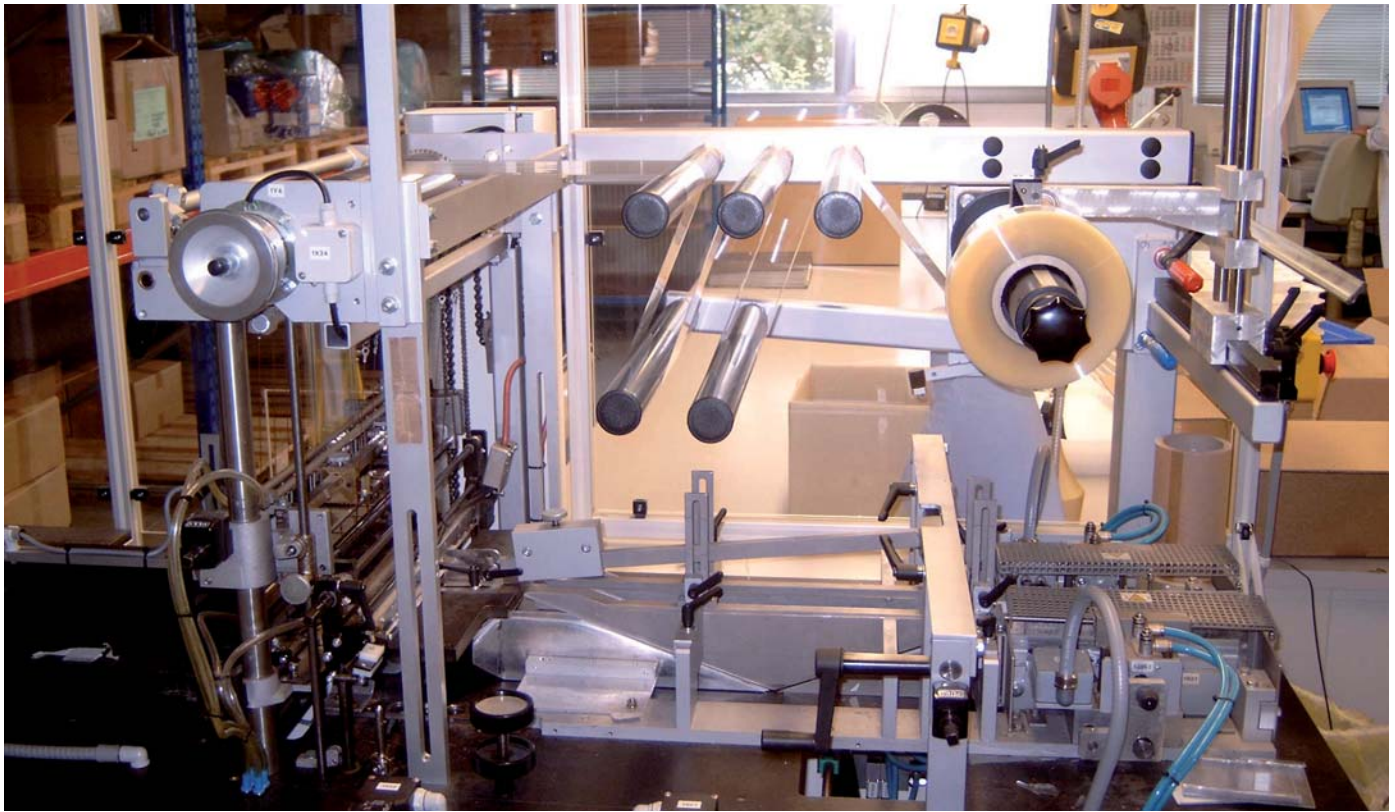

Another important key point in our range of services is the filling packaging for your bulk material. Only first-class raw material is used for the production of your products. The products are delivered to your hands perfectly filled, packaged and accompanied with correct documentation. It is this, together with our professional knowledge and our modern production facilities, that enables us to support your cosmetic business and help your company to flourish.

### OUR SERVICE

The professional know-how of Neo Cos Service GmbH for the successful manufacturing of cosmetics products assures modern and internationally accepted dermal cosmetic formulations and cutting-edge skin care products.

To ensure the consistently high quality standards of our cosmetic products the entire production process, including filling and packaging, is monitored in accordance with the regulations defined in the GMP (Good Manufacturing Practice) for cosmetic products and with current packaging regulations. We use exclusively raw materials which fulfil the requirements of the KVO (Kosmetik Verordnung - Cosmetic Regulation) and those of current EU regulations.

Modern filling systems

The cosmetic products are made highly transparent by means of the declaration of ingredients which is made in accordance with both the INCI (International Nomenclature Cosmetic Ingredients) and the internationally accepted CTFA nomenclature (Cosmetic, Toiletry and Fragrance Association Inc. USA). We also structure your advertising messages and product specifications in accordance with the competition laws, your own objectives and your budget concepts.

Our full-service programme is complemented by dermatological, toxicological and microbiological certificates.
